ABOUT

I'm 20. I build websites, web automations, web scraping tools and desktop applications. I start a project not only to finish it, but to learn while building it. Right now I'm focused on learning which projects to use AI models in, and how to use them efficiently.

EDUCATION

Bolu Abant İzzet Baysal University
Computer Programming · in progress

Handan Hayrettin Yelkikanat Vocational and Technical Anatolian High School
Information Technologies

EXPERIENCE

Pivot Elektronik
Intern · during high school

LookUs
Intern · during high school
